SUMMARY

Informatics undergraduate at UPN "Veteran" Yogyakarta interested in Machine Learning, GIS Analytics, and Data Science, with skills in Python for predictive modeling, spatial analysis, and software development, and experience in leadership, project coordination, logistics, and teamwork.

PENGALAMAN ORGANISASI & KEPANITIAAN

President | UKM Hindu Dharma UPN "Veteran" Yogyakarta **May, 2026 – Present**

- Lead an organization consisting of five divisions and an Executive Board (BPH).
- Coordinate the implementation of four annual work programs covering religious activities, social programs, human resource development, and member development.
- Represent the organization in communications and collaborations with university authorities, student organizations, and external institutions.
- Supervise budgeting, project timelines, and program evaluations to ensure organizational objectives are achieved.

Logistics & Equipment Coordinator – Social Service Program | UKM Hindu Dharma UPN "Veteran" Yogyakarta **November, 2025**

- Led the logistics team in planning and distributing equipment for the social service program.
 - Managed participants' logistical requirements and ensured all necessary equipment was available on schedule.
 - Coordinated with vendors and external partners to procure goods efficiently.
 - Controlled logistics distribution and inventory throughout the event to ensure smooth operations.
-

EDUCATION

SMA Negeri 1 Toili | MIPA **2020 - 2023**

- Average Score: 87.15/100
- OSN Informatics – Represented the school at the provincial level in 2021 and 2022.
- Ranked among the Top 6 eligible students for the 2023 SNBP university admission selection.

Universitas Pembangunan Nasional "Veteran" Yogyakarta | S1 Informatika **2023 – Present**

- GPA 3.61/4.00 | 133 credits completed
-

TRAINING & BOOTCAMPs

Asah Program (led by Dicoding in association with Accenture) | Cohort Machine Learning **2025 August - 2026 January**

- Final Average Score: 91.07/100
- Best Capstone Project Award (Tim A25-CS305)

Badan Nasional Sertifikasi Profesi | Junior Web Programmer **2025 August - 2026 January**

- Certified Competent in Software Programming and Development.

SELECTED PROJECTS

Karangtalun Village Profile Website

Academic Project – Community Service Program (KKN)

Tech: React, Vite, Leaflet, React Router, Recharts

- Developed a village profile website using React with Static Site Generation (SSG).
- Built an interactive map using Leaflet and GeoJSON, along with a population statistics dashboard.
- Implemented Markdown-based content management and SEO optimization.

Article & Interaction Web Portal

BNSP – Junior Web Programmer

Tech: PHP Native, MySQL, HTML, CSS, JavaScript

- Developed a dynamic article portal with role-based authentication.
- Implemented CRUD functionality for articles, comments, likes, and contact forms.
- Designed a relational database and implemented user session management.

Student Dropout Prediction

Dicoding – Belajar Penerapan Data Science

Tech: Python, Streamlit, Metabase, Scikit-learn

- Developed a student dropout prediction system and an educational analytics dashboard.
- Built and evaluated a Random Forest classification model achieving 91.05% accuracy.

EuroSAT Satellite Image Classification

Dicoding – Belajar Fundamental Deep Learning

Tech: TensorFlow, CNN, TensorFlow Lite, TensorFlow.js

- Developed a CNN model to classify satellite imagery into 10 land-use classes.
- Achieved 87.3% test accuracy and exported the model for multi-platform deployment.

Customer Segmentation for Personalized Retail Marketing

Best Capstone Project – Asah (Dicoding × Accenture)

Tech: Python, Scikit-learn, Streamlit

- Developed a customer segmentation system using RFM analysis and K-Means clustering.
- Built a Streamlit dashboard for customer segment visualization and prediction.
- Generated marketing strategy recommendations based on customer segmentation.

Employee Attrition Prediction & HR Analytics Dashboard

Dicoding – Machine Learning Terapan

Tech: Python, Scikit-learn, XGBoost

- Developed an employee attrition prediction model and an HR analytics dashboard.
- Selected Logistic Regression as the best-performing model (ROC-AUC 0.804, recall 78%).

Financial Transaction Analysis & Anomaly Detection

Dicoding – Belajar Machine Learning untuk Pemula

Tech: Python, Scikit-learn, PCA, K-Means

- Performed transaction segmentation using PCA and K-Means clustering.
- Developed Decision Tree and Random Forest models with Bayesian Optimization.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-Score.

Air Quality Analysis Dashboard

Dicoding – Belajar Fundamental Analisis Data

Tech: Python, Streamlit, Pandas, Folium

- Performed data cleaning, exploratory data analysis (EDA), and visualization of air quality data.
- Developed an interactive Streamlit dashboard and an interactive map using Folium.

CERTIFICATIONS & AWARDS

Professional Certifications

- Machine Learning Graduate | Program Asah (Dicoding & Accenture) | Jan 2026
- Junior Web Programmer | BNSP - LSP Media Informatika | Dec 2025
Competency Focus: Data Structures, UI Implementation, Structured Programming, Library Integration, Code Documentation, & Debugging.

Achievements & Awards

- Provincial-Level Participant of the National Science Olympiad (OSN-P) in Informatics | Education Office of Central Sulawesi Province | 2021 & 2022
Achievement: Represented SMA N 1 Toili and successfully passed the OSN-K qualification to compete at the provincial level for two consecutive years.
- Best Capstone Project Awardee | Program Asah (Dicoding & Accenture) | Jan 2026
Achievement: Selected as the best final project through the "Customer Segmentation for Personalized Retail Marketing" project.

AI & Data Science Skill Certifications (Dicoding Academy)

- Membangun Aplikasi Gen AI dengan Microsoft Azure | 2026
- Belajar Penerapan Data Science dengan Microsoft Fabric | 2026
- Belajar Penerapan Data Science | 2026
- Membangun Sistem Machine Learning | 2025
- Belajar Fundamental Deep Learning | 2025
- Belajar Fundamental Analisis Data | 2026
- Belajar Machine Learning untuk Pemula | 2025

Software Development & Tools Certifications (Dicoding Academy)

- Memulai Pemrograman dengan Python | 2025
- Belajar Dasar Git dengan GitHub | 2025
- Belajar Dasar AI | 2025
- Memulai Dasar Pemrograman untuk Menjadi Pengembang Software | 2025
- Pengenalan ke Logika Pemrograman (Programming Logic 101) | 2025

Komdigi Training (Digital Talent Scholarship)

- Micro Skill Series: AI Engineer For Milenial, Ethical Hacker For Dummies, Introduction to Cloud Computing, Computational Thinking (SMP & SMA), & Pelindungan Data Pribadi | 2022

SKILLS

Programming Languages	Python, SQL, JavaScript, PHP
Machine Learning & AI	Scikit-learn, TensorFlow, Deep Learning, Machine Learning, Computer Vision
Data & Analytics	Pandas, Data Analysis, Data Visualization
Web Development	React, HTML, CSS, Streamlit
Database & Tools	MySQL, Git, GitHub
Productivity	Microsoft Excel, Microsoft Word, Microsoft PowerPoint
